PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building responsive web applications and business-oriented digital solutions. Skilled in JavaScript, React, Node.js, Express, PostgreSQL, HTML and CSS, with additional hands-on experience in Python, FastAPI, APIs, WebSockets and automation workflows. Strong background collaborating with cross-functional teams, translating requirements into scalable solutions, debugging production issues and delivering clean, user-focused software.

CORE TECHNICAL SKILLS

Frontend	React, JavaScript, HTML5, CSS3, responsive design, component-based UI
Backend	Node.js, Express, REST APIs, Python, FastAPI, WebSocket fundamentals
Databases	PostgreSQL, MongoDB, SQL, data modeling basics
Tools & Workflow	Git, GitHub, Visual Studio Code, Google Colab, API testing, deployment basics
Professional Skills	Problem solving, teamwork, communication, debugging, quality assurance
Languages	Spanish: Native English: Professional working proficiency

PROFESSIONAL EXPERIENCE

Interactiva Group S.A.S. | Junior Full-Stack Web Developer | Dec 2021 - Dec 2023 | Colombia

- Built and maintained web applications for financial-sector clients using JavaScript, React, Node.js, Express, PostgreSQL, HTML and CSS.
 - Contributed to a web solution that helped the coaching team increase sales by 60% through better digital access and user workflows.
 - Developed responsive user interfaces that improved the overall user experience and supported a 30% increase in website traffic.
 - Collaborated with cross-functional teams to analyze requirements, propose scalable solutions and deliver high-quality code aligned with project standards.
 - Troubleshooted and debugged technical issues, reducing website downtime by 20% and improving system stability.
 - Performed testing and quality assurance tasks to identify bugs, improve functionality and increase user satisfaction.
- Technology stack:** JavaScript, React, Node.js, Express, HTML, CSS, PostgreSQL.

SELECTED TECHNICAL PROJECTS

- Full-Stack E-commerce Applications:** Built product-focused web applications with React, Node.js, Express and PostgreSQL, including product catalogs, search, filters, forms and API integration.
- AI Chatbot and Lead Automation Workflows:** Developed backend prototypes using Python/FastAPI, WebSockets, PostgreSQL and external API integrations to support conversational flows, lead capture and business automation.
- Computer Vision Game Tracking Systems:** Worked with Python, OpenCV, YOLOv8, real-time event processing and UDP communication with Unity for physical game detection and tracking scenarios.

EDUCATION

Universidad de San Buenaventura - Medellin, Antioquia | Sound Engineer | May 2012

CERTIFICATIONS

- Full Stack Web Development - Henry, 2024
- Programming Foundations with JavaScript, HTML and CSS - Duke University | Coursera, 2022
- Python-Django Programming Language - La U.T. VIEW Foundation & Comfenalco Antioquia, 2022
- Python Classes and Inheritance - University of Michigan | Coursera, 2021
- Data Collection and Processing with Python - University of Michigan | Coursera, 2021
- Python Functions, Files and Dictionaries - University of Michigan | Coursera, 2021
